Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the student-facing interface for entering questions and viewing generated learning content.	React + Vite
API / Backend	Validates requests, manages learning operations and connects frontend functions to AI services.	FastAPI + Python
AI Integration	Generates answers, explanations, summaries, quizzes and recommendations.	Google Gemini API

Data Storage

Stores structured application/session data and quiz results.
